

## One Stop: Multi-V Belt Kit

We have developed the new ContiTech Multi-V Belt Kits for every aftermarket mechanic for whom efficiency and reliability are important. They are suitable for 565 vehicle models from 24 manufacturers covering almost 4500 different applications. This means they cover the most popular vehicles on the European market.

#### Augmented Reality

Graphics with this symbol provide additional content like 3D-illustrations or animations that can be displayed on your smartphone or tablet PC. Just install the free ContiDrive App or the Junaio App and scan the graphic to get the augmented contents.

Available for iOS and Android.

# Full control of tension:

## Multi-V Belt Kit

After changing a multi V-belt, long-term trouble-free running is only assured if the belt tension is correct. It therefore makes sense to also replace all the wear parts in the belt drive, e.g. tensioning and idler pulleys or dampers, whenever a belt is changed.

ContiTech's Multi-V Belt Kit ensures that fitters immediately have all the necessary components at hand - optimally matched to each other and ready for immediate use. That makes the belt change simpler and faster. Furthermore, because all the components come from a single source, there is also just one

point of contact for all service queries. That makes operations in the workshop more economical and efficient. In addition, workshops are fitting original equipment quality when they use ContiTech components.

You can rely on it, and your customers also appreciate it: Multi-V Belts from ContiTech are generally not ground, but manufactured in a molding process. That ensures optimal dimensional precision, long service lives and smooth running. The quality of the components can also be seen in the detail, for instance in the deep groove ball bearings used.

These long-life bearings are fitted with an enlarged grease reservoir and deliver outstanding performance because of their high load ratings. They therefore work particularly reliably and quietly.

### Contents

- > Multi-V Belt
- > Tensioning and idler Pulleys
- > Tensioning Dampers
- > Fixing Material

### Benefits

- > Precise allocation to specific vehicles
- > Perfectly matched components
- > Original quality

#### Baseplate (mounting flange)

Made of die-cast aluminum

#### Sliding bearing

Enables rotation of the tensioning arm

#### Friction lining

With steel friction ring (outer)

#### Torsion spring

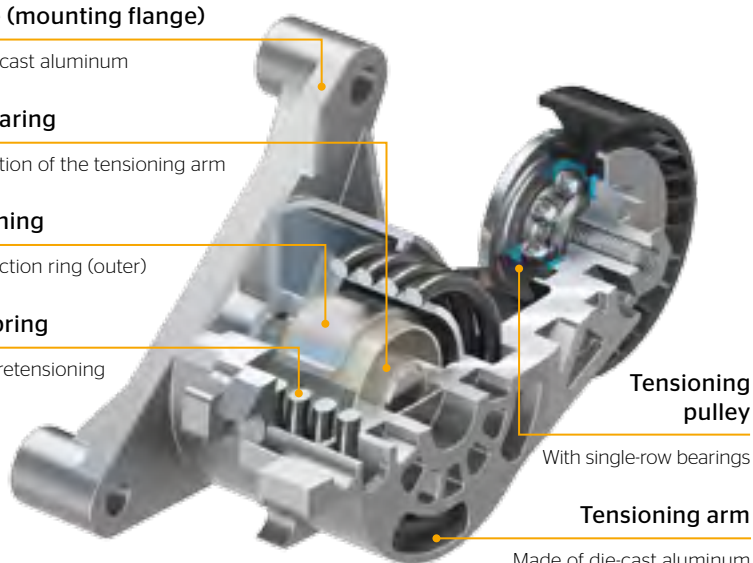

Generates pretensioning

#### Tensioning pulley

With single-row bearings

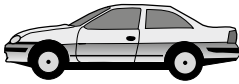

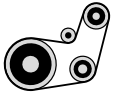

#### Tensioning arm

Made of die-cast aluminum

## 7PK

7PK1125K1	Renault (Grand)Scénic / Megane 1.9 dCi, D, 2.0 (Tce) (16V)	2002-
-----------	--	-------

We have developed the new ContiTech Multi-V Belt Kits for every aftermarket mechanic for whom efficiency and reliability are important. They are suitable for 565 vehicle models from 24 manufacturers covering almost 4500 different applications. This means they cover the most popular vehicles on the European market.

More information available in the PIC.

## ContiTech. Engineering Next Level

As a division of the Continental Group, ContiTech is a recognised innovation and technology leader in natural rubber and plastics. As an industry partner with a firm future ahead of us, we engineer solutions both with and for our customers around the world. Our bespoke solutions are specially tailored to meet the needs of the market. With extensive expertise in materials and processes, we are able to develop cutting-edge technologies while ensuring we make responsible use of resources. We are quick to respond to important technological trends, such as function integration, lightweight engineering and the reduction of complexity, and offer a range of relevant products and services. That way, when you need us, you'll find we're already there.
