

## **CONTI-AIR® STEEL CTZ**

Coldset Metalback Printing Blanket

# CONTI-AIR® STEEL CTZ

## The metalback blanket with a robust surface for various printing conditions

- › Recommended for 4-high tower and satellite presses
- › Medium to hard blanket construction
- › Neutral Feeding Characteristic (within CA MBB Range)
- › Developed for highest durability
- › For Coldset, Heatset, UV and hybrid applications
- › Using the special CONTI-AIR® microcell technology

### Guiding Value

|                                   |                          | Standard           |
|-----------------------------------|--------------------------|--------------------|
| <b>Color:</b>                     | blue                     |                    |
| <b>Surface:</b>                   | ground                   |                    |
| <b>Hardness of face compound:</b> | approx. 59 Shore A       | DIN ISO 48-4*/**   |
| <b>Thickness:</b>                 | according to OEM drawing | DIN EN ISO 2286-3* |
| <b>Metal base:</b>                | stainless steel          |                    |
| <b>Backside:</b>                  | calibrated film          |                    |

\* Average value obtained in accordance with the given standard. Please note that the number of samples tested may differ

\*\* The specified hardness of the cover compound can only be measured using test samples according to the standard. It is not possible to measure the hardness directly on the product itself.

Unsere Drucktücher verfügen über eine spezielle CONTI-AIR® kompressible Schicht geschlossener Mikrozellen mit Überdruck.

Our printing blankets have a special CONTI-AIR® compressible layer of over pressured microcells.
