

		Description	Liner	Size	Pressure
<b>RUBBER HOSES</b>					
	<b>Vintner™ Reserve</b>	The ideal hose for the brew and wine industry for decades. Versatile discharge hose to handle full vacuum. Monofilament helix is a rust-proof and a crush-resistant alternative to traditional soft wall hose. Easy to clean, light weight, kink-resistant. Improved design in 2018.	Chlorobutyl	1/2"-4"	250 PSI
	<b>ExtremeFlex™ Beverage</b>	The ideal hose for applications requiring flexible and tight bend connections. Special shiny cover makes cleaning easy with the EZ Clean cover. Ideal hose for brewpubs, where visitors have visual contact with the equipment. Microban® version available.	Chlorobutyl	1 1/2"-3"	150-250 PSI
	<b>Purple Snake®</b>	The most popular hose for the beer industry from Germany. Extruded liner is completely homogenous, imparts no taste. No steel helix, still handles the required vacuum. Robust, kink-resistant hose with long lifetime under extreme working conditions.	EPDM	1"-4"	232 PSI
	<b>Distillery 150</b>	The hose to transfer high-proof alcohol in distilleries: it can handle 100% alcohol concentration. A great chemical hose that handles 97% of the chemicals on the market.	UHMWPE	1 -4"	150 PSI
<b>PVC HOSES</b>					
	<b>Pliovic® FG (FDA-3A)</b>	A versatile, lightweight, reinforced tubing for the food and beverage, general air, multipurpose, pharmaceutical and cosmetics industries. Commonly used in bottling applications.	Clear Pliovic	1/4"-1 1/2"	150-250 PSI
	<b>Velocity™ Beverage</b>	Lightweight, easy-to-handle PVC hose. Economic solution for lightweight operations like microbreweries. Commonly used in wineries. Transparent hose construction ensures visibility of the liquid.	Clear Pliovic	1/2" - 4"	75-110 PSI
<b>WASHDOWN HOSES</b>					
	<b>Super Sani-Wash™ 300</b>	High quality hot water washdown and cleanup up to 200°F (93°C). Used in food processing plants, dairies, packing hoses, bottling plants, breweries, canneries and creameries, Microban® antimicrobial protection in cover; white tube is comprised of FDA-compliant materials.	EPDM	1/2" - 1"	300 PSI
	<b>Blue Fortress® 300 with Microban® PP</b>	High quality washdown hose for hot water washdown application in food processing, dairies, packing houses, bottling plants, breweries, canneries and creameries, Microban® antimicrobial cover. ARPM Class A high oil resistance and blue Carbyn™ cover for high abrasion resistance.	White FDA Nitrile	1/2" - 1"	300 PSI
<b>ACCESSORIES</b>					
		Dinga is water-saving nozzle that has a long service life due to its brass or stainless steel design. It's protected against hot, cold, shock, caustic solutions and acid. Dinga also helps save on energy costs. Other features include: chemical-free cleaning capability and the flow can be adjusted from a fine spray to a concentrated jet.			
Rubber protection rings are ideal for beverage and food processing applications. The rings lift the fitting off the floor and protect both the floor and fitting from scratches caused by a drop. The inner diameter of the protection ring is a bit smaller than the outer diameter of the hose to prevent it from sliding off.
