Managing Conveyor Systems

Standard Features

Minimize conveyor failures and downtime with Conti+ 2.0. It's our web and mobile app service platform that provides you with a centralized database and a toolbox that helps maximize the performance and profitability of a conveyor system operation. Conti+ 2.0 gives you, your distributor and Continental conveyor belt experts easy access to information to improve performance and efficiency of your system.

Advanced Contact Options

- › Find your local Service Support
- › Request a Quote

Browse Our Product Line

- › See the most up-to-date technological advancements in the Conveyor belt industry

Technical Tools

- › Load capacity
- › Troughability
- › Belt reel dimensions
- › Safety first calculator
- › Unit converter (metric/imperial)
- › Belt revolution
- › Wrap angle of belt on pulley

Advanced Options

When you need greater detail from reports along with vital options that give you a complete picture of your system, our Advanced options deliver them. Contact your Continental representative for more information on our Advanced options.

- › Storage of conveyor data, i.e., files, reports, photos, videos, drawings, etc.
- › Belt cover wear dashboard & belt life predictions
- › Web portal and secure cloud-based database
- › Inspection recording with standardized reports
- › Conveyor simulation tool to calculate relevant conveyor physical parameters such as belt tensions, horsepower, take up, transition zones, etc.
- › Live sensor information on IoT dashboards from Continental belt and conveyor monitoring system such as MultiProtect, LoadSense and ConveyorInspect.
