The TOOL BOXES

Speed is of the essence in the tough workshop world. At the same time, care and quality are needed to ensure the maximum safety for the customer. Reconciling the two is a major challenge - which fitters reliably master using ContiTech's TOOL BOXES.

These robust cases contain all the tools you need to enable you to work safely and quickly on a belt drive. From a locking tool to the appropriate tensioning tool. Made in Germany using high-grade steel.

We have put together the tools in the individual cases so that they precisely meet the requirements of different vehicle types. Only ContiTech supplies sets in this form. They simplify operations and save a great deal of time. Tools are therefore turned into a competitive edge.

French for pros:

TOOL BOX V02

for Renault

Renault engines are reliable – and therefore in widespread use. In the workshop, however, they have their quirks. When changing the multi V-belt with some engines, for example, it is essential for the belt tensioner also to be changed. That can be carried out quickly and reliably using the special tools in TOOL BOX V02 for all common Renault models.

TOOL BOX V03

for Citroën and Peugeot

If you intend servicing a Citroën or Peugeot engine, special requirements have to be met, particularly with regard to the timing gear. There are also a lot of freewheels. That means that the crankshaft and camshaft can only be locked and released using special tools. TOOL BOX V03 offers everything you need for a fast, safe repair to ensure that the engine runs exactly in accordance with the manufacturer's specifications after the repair. Long live perfection!

Safe and sound: TOOL BOX V04 for Ford and Opel

Cars from Ford and Opel have a reputation for solid quality. To ensure that this lasts throughout the car's lifetime, details are important when changing the timing belt - for example, precise locking of the high-pressure fuel injection pump. You need special tools when performing this operation with Ford and Opel vehicles. All of these are contained in TOOL BOX V04.

Contents

- > Locking tools and locking pins for crankshafts and camshafts
- > Counterhold for camshafts
- > Multilingual manual with tool designations, original part nos. and vehicle applications
- > Puller for camshaft sprocket

Benefits

- > All tools for all common Ford and Opel engines quickly to hand
- > German-made tools - manufactured from tough, high-grade steel
- > Exclusive sets - only available from ContiTech
- > Organized storage in a robust case

Prepared for everything: Other TOOL BOXES just in case

One for almost everything: The TOOL BOX is the basic equipment for servicing, removing and fitting power transmission belts. It contains tools that are needed when working on a belt drive, from locking tools and pins to the appropriate sockets for the camshaft, crankshaft, flywheel and fuel injection pump through to a tensioner and counterhold.

A practical inclusion is the stethoscope, which can be used to locate bearing noise in the engine compartment. The TOOL BOX tools are based on the functionality of the manufacturers' own tools, but cover the commonest European models.
Benefits: comprehensive equipment, organized layout, inexpensive set price.
